DETAILED ACTION

1. This action is in response to the amendments/remarks filed on July 17, 2006.

Allowable Subject Matter

2. Claims 1 – 10, 12 – 32 and 35 – 43 are allowed.
3. The following is an examiner's statement of reasons for allowance: The Admitted prior art Moran U.S. Patent 6,647,400, hereafter "Moran", disclose an intrusion detection system comprising an analysis engine configured to apply forward- and backward-chaining using rules from the source of rules, where the rules configure the system to collect, correlate, and evaluate data related to all phases of an attack, enabling detection of attacks involving novel (unknown) components and attacks where all evidence of one or more components is missing. Moran further discloses an intrusion detection system comprising a mechanism for checking timestamps, configured to identify backward and forward time steps in a log file, filter out expected time steps, correlate them with other events, compares the timestamps of a directory and its files and identifies values that are inconsistent or not accounted for, and assigns a suspicion value to the associated file or directory.

However, the admitted prior art does not disclose, teach or suggest "A method detecting intrusions using a host-based intrusion system, comprising: reading kernel records; reformatting each of the kernel records into a different format, wherein the different format is a memory mapped file; and parsing the records and comparing the parsed records against one or more templates."

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
